Flow of the family hub

Shared Caregiver Flow

1. **Add Family Member** *(Already Implemented)*
User adds a family member (e.g., Papa) to their Family Hub.
2. **Invite Caregiver** *(To Be Built)*
Open **Manage Caregivers**, invite another registered LifeWise user (e.g., Priya) via email or phone.
3. **Accept Invitation**
The invited caregiver accepts the request, and the family member is added to their Family Hub.
4. **Shared Care**
Both caregivers receive the same reminders, alerts, and notifications for that family member.
5. **Real-Time Sync**
If one caregiver marks a task (e.g., medicine taken) as completed, it is instantly updated for all connected caregivers.
6. **Manage Caregivers**
Caregivers can invite additional members or remove existing caregivers at any time.

Flow:

Add Family Member → Invite Caregiver → Accept Invite → Shared Profile → Shared Notifications → Real-Time Updates → Manage Caregivers
